Report Card FAQs

How do I look at my prescriptions?
You can check your prescriptions on www.azrxreporting.com under "Request" > "Practitioner Self-Lookup" to make sure the record is accurate. If you do not have access yet, you can use pharmacypmp.az.gov for more information about registration and accessing the data.

The mailing address on my report card is wrong, how do I fix it?
We get our physical address information from the address linked to your DEA number, if you would like your address changed, contact the DEA, **http://www.deadiversion.usdoj.gov/**.

How can I change my specialty?
If you believe another specialty could make for more helpful comparisons on future reports, email **jgreenhalgh@azpharmacy.gov** with your DEA#, NPI#, and your preferred specialty from the list below:
Nuclear Medicine, Genetics, Pathology, Addiction Medicine, Preventive Medicine, Dentists-Orthodontics, Rheumatology, Hospice, Physical Medicine & Rehab, Optometry, Podiatry-General, Otolaryngology, Podiatry-Surgical, Urology, Radiology, Pain Medicine, Oncology, Anesthesiology, Dentists-Surgical, Naturopath, Neurology, Orthopedic Surgery, OBGYN, Surgery, Pediatrics, Psychiatry, Other PA-APN, Emergency Medicine, Dentists-General, Internal Medicine, or Family Medicine.

How do I see which patients went to more than 5 doctors/pharmacies?
Unfortunately, we don't currently have a way to send patient names for the 5+ docs, 5+ pharmacies, however, monthly, the Board of Pharmacy does send out letters with lists of patients who went to 4+ prescribers AND 4+ pharmacies to all those patients' prescribers. You can also do a practitioner self-lookup to get a list of your patients and then run a search on individual patients on azrxreporting.com. If you do not have an access account, you can sign up for one at **https://pharmacypmp.az.gov/** under "Accessing the Data."

These numbers on the report card don't seem correct. What can I do?
Double check that you are reading the report correctly and that you are indicated as blue and your peers are red. Verify the information by pulling your own report. If something is incorrect within the report, please contact the pharmacy listed and verify if the pharmacy made a mistake or if it is a fraudulent prescription. If the pharmacy submitted incorrect information then the pharmacy needs to correct the information and resubmit the data.

I registered for the CSPMP but my report card states that I don't have access?
There are two steps to gain access to patient records. If you are registered it does not indicate that you have access to the data.
Choose which pertains to you:
I registered but do not have access.

I have not registered.
